## What Our Customers Say...

*I would like to say thank you for a job well done on our recently safety training for Maine DOT employees. Maine Oxy also conducts our annual inspections and are the reason we have had an exceptional safety record.*

*Another thing I truly appreciate, is that your service technician, Ken looks out for us. Several months ago, I received a call from Ken expressing concern about an order. Ken was concerned because he knew that the part ordered was too big for our equipment. I really appreciated that call. Without Ken's call, someone may have been injured. This is the kind of service you can't buy, but comes with having caring and knowledgeable people that go the extra yard for their customers!*

Lulu Begin  
Occupational Safety Engineer, State of Maine

*As Bowdoin College's EHS Manager, I have had the pleasure of working with Maine Oxy and their local representative for going on four years, both for our annual employee safety training and our semi-annual welding equipment inspections and maintenance.*

*I have found their work to be professional, comprehensive, and very much based in years of hands-on experience, and their equipment to be of the highest quality. I would not hesitate to recommend their services and products to anyone.*

Mark Fisher  
EHS Manager, Bowdoin College

*We have maintenance and inspection schedules set up for all our trucks and heavy equipment. It saves us money, downtime and injury. I never thought to do the same with our welding and cutting equipment until Ken from Maine Oxy came to us and explained their program. I realized then what an oversight it had been and all the bullets we had dodged over the years. We have always used torches and welding equipment but had very little professional instruction in the care and maintenance of them. Maine Oxy came in with a very informative presentation on safety and maintenance to get us up to speed and that very day Ken implemented a scheduled inspection program for us. We now enjoy the same benefit from a regular program with our tools as we do with our heavy equipment.*

*I am very satisfied with the program and would never run without it again.*

Chris Grondin  
Equipment Manager, R.J. Grondin & Sons
