

SPEC-AIR SPECIALTY GASES

Our History

Maine Oxy was founded in 1930 in Auburn, Maine. In 1935, the company incorporated as Maine Oxy-Acetylene Supply Company.

Maine Oxy is a third generation family managed and employee owned company. James H. Albiston joined his father in 1948 and the current CEO, Bruce W. Albiston joined his father in 1972.

From its modest beginnings, Maine Oxy has expanded to a company with multiple sales and manufacturing locations and currently operates from eight locations in Maine, New Hampshire and Massachusetts.

Spec-Air Gases and Technologies, the specialty gas division, was established in 1993. The Spec-Air gas manufacturing laboratory with full specialty gas capabilities is located in Auburn, Maine. Leading the industry in replacing disposable calibration gas cylinders with refillables, Spec-Air introduced the Enviro-Cyl line of environmentally friendly refillable products to the industry.

Some more of Maine Oxy's expansions include, a new state-of-the-art acetylene production facility (Dirigo Technologies), and the expansion of our welder rental and services division,

now renting MIG, TIG, Stick, plasma and portable gas and diesel welder generators.

The New England School of Metalwork is our most recent addition. The school has two core programs — welding and blacksmithing. The school features programs in all welding related areas including welding safety, MIG, TIG and Plasma. All courses emphasize welding safety and technique. The blacksmithing and ornamental artwork programs are designed for all levels, from beginners through advanced. Summer workshops are also featured.

Throughout its history, Maine Oxy has continually exceeded customer expectations by offering competitive prices and being a market leader in offering the most current technology.

Maine Oxy is proud to be a leader in welding, industrial gases and specialty gases. The company's continued success and continued growth is attributed to its employees who believe in earning their customer's business. At Maine Oxy, customers are our reason for being.

Maine Oxy — we take pride in where we came from and even more pride in where we're going!

Services & Capabilities

- 24 hour/7 days per week Emergency Services & Technical Support, including Chemtrac
- Safety Training & Seminars
- Mobile Weld Training Trailer
- Rentals & Leases
- Complete Product & Safety Training
- Industrial & Medical Gases
- Specialty Gases
- Quality Welding Equipment & Accessories
- Safety Equipment & Products
- Bulk Gas & Tube Trailers
- System Engineering
- Micro Bulk installation & Delivery
- In-house Technical Support
- Welder & Equipment Rentals/ Leasing
- Acetylene Production Facilities
- Engineered Welding Systems
- International Sales & Distribution
- Cost Reduction Programs
- Complete Cylinder Maintenance
- Process Piping & Medical Piping
- Welder & Gas Equipment Repair
- AWS Certified Welding Inspectors
- AWS Certified Welding Educator
- Hydrogen Systems LLC
- Cryogenic Systems
- Gas Mixing Stations
- Automatic Manifold Systems
- Laser Gas Systems
- Certified Safety Engineers
- Membranes & Fuel Cells
- Gift Cards
